ACTIVE-Connectors

Connectors have been designed to easily connect Niagara to cloud platforms and databases. We distinguish real-time connectors (IoT Hub, IoT Core, MongoDb...), history connectors (SQL, Elasticsearch...) and dedicated connectors (CMMS Fiix, BIM Maintenance apps...)

Real-time connectors

Get started

Set-up your license

Connectors philosophy

Learn the basis for real-time connectors and how a they are all structured

Mongo DB

Mongo Database connector for Niagara

AWS IoT Core Connector

Amazon Web Service IoT Core connector for Niagara

Azure IoT Hub

Microsoft Azure IoT Hub connector for Niagara

Google IoT Core

Google Cloud IoT Core connector for Niagara

MQTT

Pure MQTT connector for Niagara for independent platforms

History connectors

Get started

Set-up your license

Elasticsearch

Send historical data from Niagara to Elasticsearch indexes

Mongo DB

Send historical data from Niagara to MongoDB

SQL

Send historical data from Niagara to SQL databases including all Niagara tags
