

# Step 3 Export data to MQTT server

## Export histories

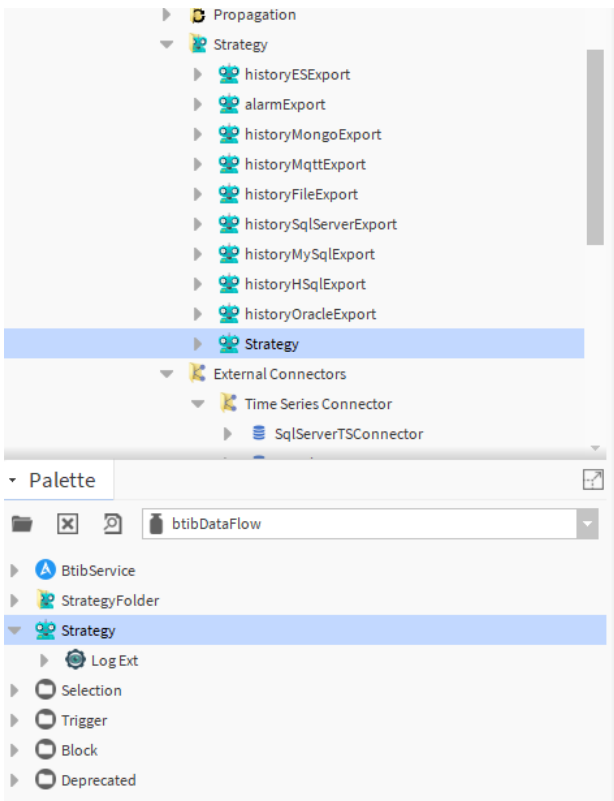

1. Go to the selection folder and create a new ord selection.

2. Fill the ord to select histories.

3. Go to the strategies folder and create a data flow strategy.

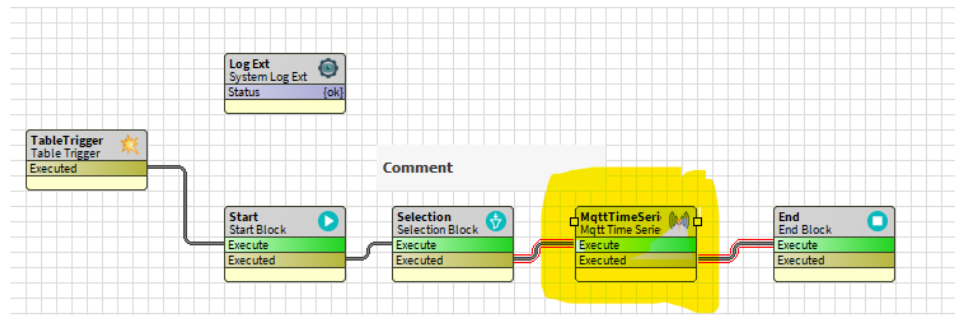

4. Add a selection block.

5. Then a trigger block.

6. And finally a mqtt export block.

7. Configure the export block.

**Mqtt Time Series Export**

MqttTimeSeriesExport (Mqtt Time Series Block)

Target: {tables} ?

Last Timestamp: null

Batch Size: 1000

Batch Delay: 0

Destinations: + [ ] x

Mqtt Connector: [ ]

Topic: export ?

OK Cancel

8. Enable the log ext.

**Log Ext**

Log Ext (System Log Ext)

Status: {ok}

Fault Cause: [ ]

Enabled: true

Log Groups: + mqttTest Finest x

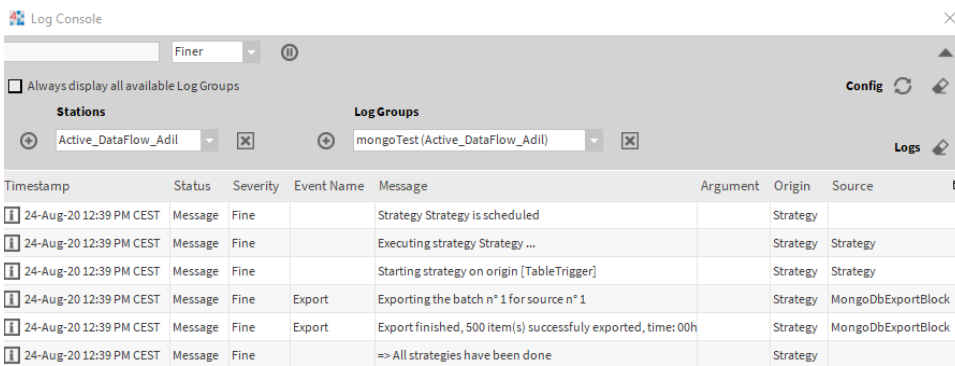

- Choose the selection we created before.

- Open the logs console.

- Open a cmd and subscribe for the topic 'C:\Program Files\mosquitto\mosquitto\_sub.exe' -t export.
- Then trigger the export.
- You should see the output on the console.

- Now verify data on the cmd.

```
PS C:\> & 'C:\Program Files\mosquitto\mosquitto_sub.exe' -t export
