btibElasticsearch

This module is specific to the synchronization of Niagara data to the ElasticSearch.

Elasticsearch is a search engine based on the Lucene library. It acts as a database to store all the data from Niagara and other sources and provides powerful search capabilities. Elasticsearch is easy to cluster to scale large volumes of data.

Getting started

Follow those steps to get a working Elasticsearch

- Step 1 Setup Elasticsearch
- Step 2 Setup the elasticsearch timeseries connector
- Step 3 Export data to Elasticsearch

Palette

- ElasticsearchTSConnector
- ElasticsearchExportBlock

Elasticsearch is a trademarks of Elasticsearch BV, registered in the U.S. and in other countries.
